PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning at the University of Mumbai. Passionate about building practical, intelligent applications using Python, AI/ML, and modern web technologies, with hands-on experience developing full-stack projects and participating in hackathons to solve real-world problems.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript
Artificial Intelligence & ML:	Artificial Intelligence, Machine Learning, Deep Learning Fundamentals
Web Development:	HTML, CSS, JavaScript, Flask
Databases:	SQL, MySQL
Tools & Technologies:	Git, GitHub

PROJECTS

NexusAI – AI-Powered Business Platform

Technologies: Python, AI/ML, Flask, MySQL, JavaScript

- Developed an AI-powered platform enabling small and medium businesses to manage core operations including invoicing, email communication, customer support, and HR through a unified dashboard.
- Built AI-driven modules such as a Business Assistant, Meeting Summarizer, Sales Predictor, and Inventory Forecasting tool to automate everyday business tasks.
- Integrated an Expense Analysis and centralized Business Dashboard to consolidate key operational data for decision-making.

College Management System

Technologies: Python, Flask, MySQL, HTML, CSS, JavaScript

- Designed and built a role-based web application for administrators, teachers, and students to manage academic and administrative workflows.
- Implemented separate modules for student management and academic information handling, streamlining access based on user roles.

Personal Expense Tracker

Technologies: Python, Flask, MySQL, HTML, CSS

- Built a web application for tracking and managing personal expenses with a simple, practical user interface for day-to-day use.

Fake Review Detection System

Technologies: Python, Machine Learning

- Created a Machine Learning-based system to identify potentially fake or suspicious product reviews, applying core ML concepts to a real-world e-commerce problem.

HACKATHONS & ACTIVITIES

- Participate in hackathons and technology competitions focused on AI and software-based solutions.
- Collaborate with team members to design and develop project solutions under time constraints.
- Work on innovative AI and software project ideas aimed at solving real-world problems.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering (Artificial Intelligence & Machine Learning)

University of Mumbai | Third Year | Semester IV CGPA: 7.52
